

Ethical Use of AI for School Communication during Practicum

Chosen School-Based Activity

The selected activity is **Literacy Week Celebration for primary school students**, organised on the occasion of International Literacy Day. This activity is appropriate for communication during practicum as it involves both school participation and parental engagement. It is important to inform parents so that they can support children's reading habits at home and encourage participation in school activities.

Key Details Written Before Using AI

- **Activity:** Literacy Week Celebration
- **Class:** Primary Classes (Grade I–V)
- **Purpose:** To promote reading habits and develop interest in books
- **Audience:** Parents and caregivers
- **Duration:** One week

Here's a simple, child-friendly notice you can use for primary school students:

NOTICE

Literacy Week Celebration

Dear Students,

We are happy to announce that our school will celebrate **Literacy Week** on the occasion of **International Literacy Day (8th September)**.

Dates: [Insert Dates]

Venue: School Campus

During this week, we will have many fun and exciting activities like:

- Storytelling sessions
- Reading aloud activities
- Drawing and poster making
- Word games and quizzes
- Book sharing day

🌟 This is a wonderful opportunity for all of you to enjoy reading, improve your language skills, and celebrate the joy of books!

All students are encouraged to participate actively.

📖 "Readers are leaders!"

[School Name]

Initial AI Prompt

"You are helping a primary school teacher write a short and professional school communication post for parents about Literacy Week celebration. The tone should be warm, simple, and informative. Avoid exaggerated or guaranteed learning outcomes."

Initial AI-Generated Draft (Summary)

The AI-generated draft included information about Literacy Week and encouraged participation. However, it used phrases such as "this will greatly improve children's literacy skills" and "ensure better academic success," which sounded exaggerated and unrealistic.

Issues Identified in the AI-Generated Draft

- The phrase "**greatly improve literacy skills**" exaggerates expected outcomes.
- The use of "**ensure academic success**" is misleading and not appropriate in professional communication.
- The tone appeared slightly promotional rather than educational.
- Some sentences were too generic and did not reflect a real classroom context.

Revisions Made Using Teacher Judgment

As a teacher, it is important to ensure that communication is realistic, ethical, and age-appropriate. The exaggerated claims were replaced with more appropriate language such as:

- “support the development of reading habits” instead of “greatly improve literacy skills”
- “encourage interest in books” instead of “ensure academic success”

The tone was made more grounded and aligned with actual classroom practices. The message was simplified to suit parents of primary school children.

Revised AI Prompt

“Write a realistic and ethical school communication post for parents about Literacy Week celebration in a primary school. Use simple and professional teacher language. Do not include exaggerated claims or guarantees. Focus on encouraging reading habits and participation.”

Final Teacher-Approved Post

Literacy Week Celebration

Dear Parents,

Our school will be celebrating **Literacy Week** on the occasion of **International Literacy Day (8th September)**. During this week, students will participate in engaging activities such as storytelling, reading aloud, word games, and book sharing.

The purpose of this initiative is to **encourage children to develop regular reading habits and build interest in books** in a joyful and meaningful way.

We request parents to support this initiative by spending some time reading with their child at home and encouraging them to actively participate in the activities.

Together, let us nurture a love for reading in our children.

Warm regards,
[Teacher’s Name]

Justification of Final Post

The final post is suitable for real school use as it uses **simple, respectful, and professional language**. It avoids exaggerated claims and presents the purpose of the activity clearly. The tone is appropriate for parents and reflects authentic classroom practices.

Reflection

This activity helped in understanding the role of AI as a supportive tool rather than a replacement for teacher judgment. While AI generated a quick draft, it included exaggerated and unrealistic statements, which are not suitable in educational communication.

By critically reviewing the AI-generated content, it became clear that **teacher intervention is essential** to ensure accuracy, appropriateness, and ethical standards. The process of refining the prompt also showed that better instructions lead to improved AI outputs.

The screenshots (to be attached) of the initial and revised prompts demonstrate how AI responses can change based on clarity and ethical guidance. This highlights the importance of human oversight in AI-assisted tasks.

Overall, this practicum reinforced that **teachers must take responsibility for the final communication shared with parents and the school community**. AI can assist in saving time and structuring ideas, but professional judgment remains central to maintaining quality and trust.
